Win Moe

Software Engineer, AI & Data Systems | **Ex-Uber · UC Berkeley CS**

winmoesuperstar@gmail.com +1 (510) 988-6909 linkedin.com/in/winmoe winmoee.com Millbrae, CA

Work authorization: U.S. Permanent Resident (no sponsorship needed)

PROFILE

Software engineer who builds AI products end to end. At Uber, built Spark and Kafka pipelines over 200M+ records a day and saved $290K a year in compute. Built a multimodal RAG system live in two products.

SKILLS

AI & LLMs: RAG, multimodal retrieval, AI agents, MCP, model evaluation, LangChain, CrewAI, Vertex AI (Gemini)
Languages: Python, TypeScript, JavaScript, Go, SQL, Java, Swift
Backend & Web: FastAPI, Flask, Django, gRPC, REST APIs, Next.js, React, Tailwind CSS, React Native (Expo)
Data: Apache Spark, PySpark, Kafka, Snowflake, Cadence, ETL pipelines, data validation, Salesforce, Power BI
Databases & Cloud: PostgreSQL, Supabase, ChromaDB, Stripe, OpenAI and Claude APIs, Google Cloud, AWS S3, Git

EXPERIENCE

Workify Lead Software Engineer **May 2026 - Present**
joinworkify.com | seinnyaungso.com | FastAPI | Gemini | LangChain | ChromaDB | Next.js | Supabase | Stripe

- Built a multimodal RAG backend (FastAPI, Gemini, LangChain, ChromaDB) that answers from service manual PDFs, text and diagrams, in the user's language, powering two live products.
- Connected it to two live products: the Workify AI repair chat and the Seinn Yaung So marketplace.
- Built the Workify SaaS (Next.js, Supabase, Stripe) with team accounts, seats and tiered billing, plus an equity vesting tracker with live pricing and tamper-proof history.

Mercor Software Contractor Feb 2026 - May 2026

- Evaluated and refined frontier AI models' software-engineering output for a top AI lab to improve their coding.

Uber Software Engineer May 2025 - Apr 2026
PySpark | Apache Spark | Kafka | SQL | data validation

- Built and tuned PySpark ETL pipelines and Kafka topics over 200M+ real-time location records a day, cutting personalization latency from 1 day to under 6 hours for A/B tests on 2B+ users.
- Cut redundant workflows and tuned Spark jobs to hold runtime under 4 hours through a migration, and built data-validation checks that caught quality issues, saving $290K a year.

Uber Software Engineering Intern, Core Services (Anomaly Detection) May 2024 - Aug 2024

- Parallelized workflow orchestration with Uber's Cadence framework in Go across 370 metric groups, cutting anomaly detection time from 1 hour to under 15 minutes while keeping fault tolerance.
- Migrated a gRPC SQL fetch-and-analysis layer from Python to Go using clean architecture.

YANMAR America Data Engineering Intern, Rural Lifestyle Business Intelligence May 2023 - Apr 2024

- Automated Salesforce-to-Snowflake ETL and Power BI dataflows, removing 4 hours of weekly manual reporting.

UC Berkeley Undergraduate Research Assistant, FactGrid Cuneiform Project (NLP) May 2022 - Apr 2024

- Built Python pipelines over 150,000+ JSON files for NLP research. Co-built a Swift iOS app with 1,000+ users.

EDUCATION

University of California, Berkeley | B.A., Computer Science 2022 - 2025
GPA 3.5 | Regents' Scholarship (full ride) | English, Burmese (native), Chinese (professional working)
Online courses: Machine Learning Specialization (Stanford) | Google Data Analytics | Google Cloud: Cloud Engineer
Hackathon: Aeruku AI sales agent (CrewAI, MCP, Next.js), our team took 2nd place and $3,000 at the Masumi Hackathon, SF
